LIVE DEMO

Let's run a real discovery dataset through the pipeline

discovery-lens.hf.space

Discovery Lens

running on Hugging Face Spaces

<https://huggingface.co/spaces/AsmaJ2026/discovery-lens>

2 GB tier

CPU-only

No DB

Multi-page Streamlit app · session_state only

01

Goal validation

Weak goal in → coaching → rewrite

02

Upload & label

6 source types, auto-suggested

03

Stakeholder context

Free-text or PDF, 500-word cap

04

Opportunity cards

JTBD, job_type, confidence, 3 scores

05

Source traceability

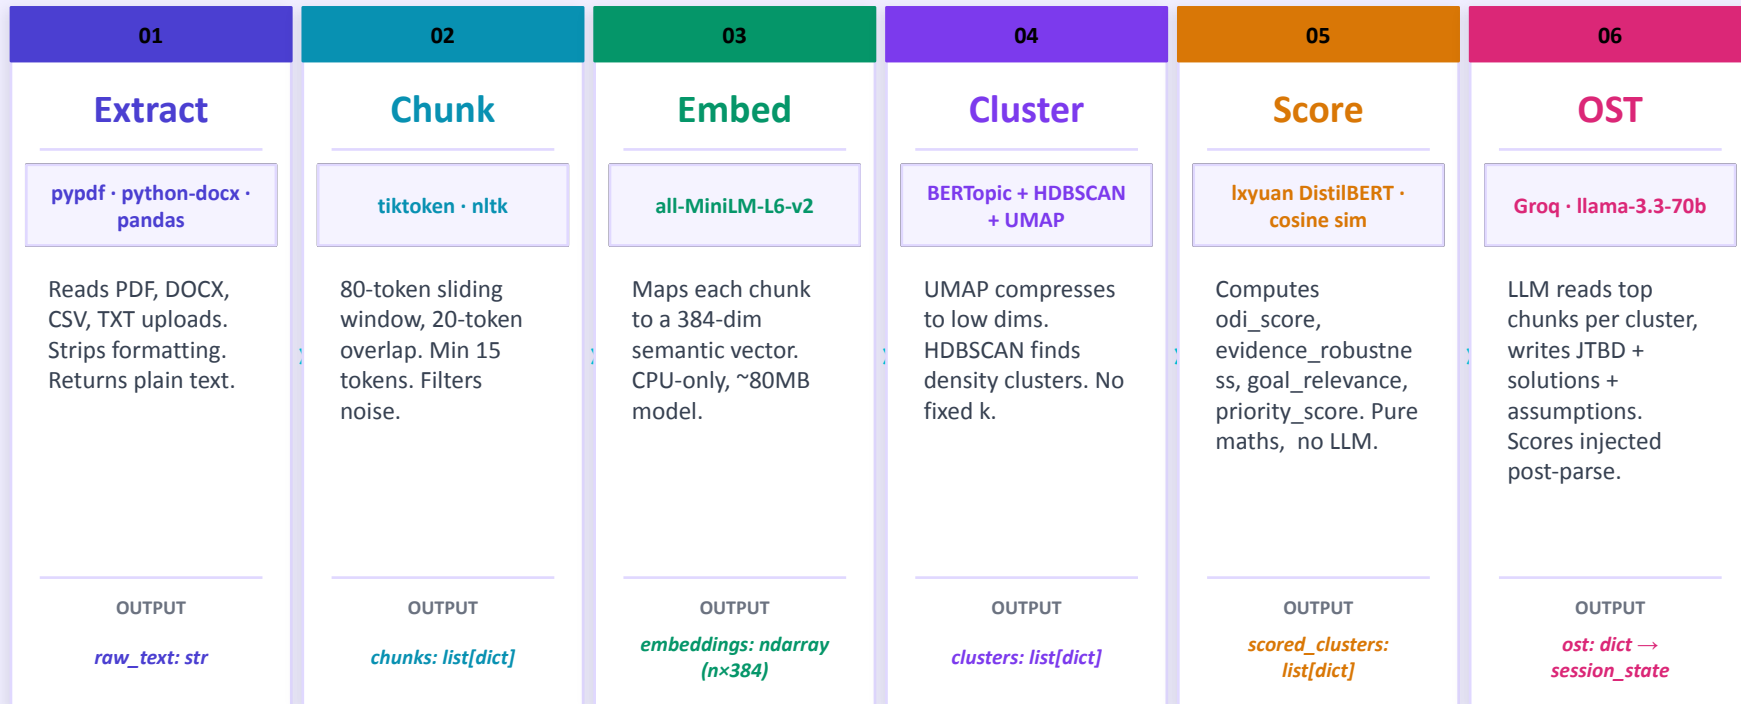

Click → exact quotes by source

06

Matrix & heatmap

Act/Validate/Monitor/Deprioritise

Six steps. Pipeline and Tech-Stack

Three scores, one priority, one action: now validated

odi_score

$\text{importance} \times (1 - \text{satisfaction})$

→ How underserved is this need?

evidence_robustness

$(\text{diversity} \times 0.65) + (\text{importance} \times 0.35)$

→ How well corroborated across sources?

goal_relevance

$\text{weighted cosine sim} \cdot \text{floor } 0.20$

→ How directly does it address the PM's goal?

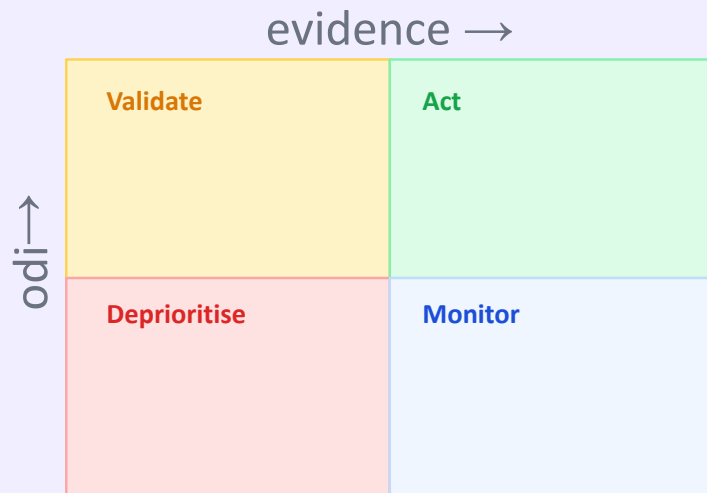

$$\text{priority_score} = [(\text{odi} \times 0.60) + (\text{robustness} \times 0.40)] \times \max(\text{goal_rel}, 0.20)$$

Validated

75 weight-grid runs × 3 datasets

Kendall $\tau \geq 0.99$ across all variants

Baseline weights confirmed · no change

Where Discovery Lens goes from here

01

PRODUCTIONISATION

- **Persistence + auth**

Save and revisit OSTs across sessions, not just a one-run tool.

- **Graph database**

The OST is inherently a graph. Neo4j enables longitudinal queries.

02

QUALITY

- **Fine-tuned sentiment SLM**

Trained on PM discovery language.

- **Competitive intelligence**

See where your product is underserved by comparison of the competition.

- **Quantitative enrichment**

Plug in funnel and adoption metrics and timestamps.

03

CONTINUOUS DISCOVERY

- **Assumption testing log**

The OST becomes a living document.

- **OST versioning**

Compare which opportunities grew, shrank, or disappeared across discovery rounds.

- **Decision audit trail**

Shareable evidence chain so every roadmap call can be justified visually.

THANK YOU
